Ford Focus RS MOVIT Brakes

The performance brakes specialists from MOV'IT have released today the details of their Ford Focus RS brake kit. Yes, the new Ford Focus RS MOV'IT brakes also come in green! The new Ford Focus RS MOV'IT brakes kit includes BILLET calipers made from ultra-high-strength aircraft spec aluminum. The pistons of the new performance brakes are positioned in a specific way, designed especially for the Ford Focus RS. In this way, they manage to offer equal pressure on the whole pad surface and an even wear. The inner part of the discs on the new Ford Focus RS MOV'IT brakes have a double directional evolvent ventilation system that keeps them cool.

The Ford Focus RS MOV'IT brakes price has not been announced yet.

MOV'IT Press Release:

306hp, 0-100km/h in just 5,9s and 263 km/h top speed – it's a real sportsman. The new MOV'IT braking system for this streetable racer does not only offer brutal braking force combined with super fine modulation ability, but it can also be painted individually – for example in "Ultimate Green".

The MOV'IT PERFORMANCE braking system consists of:

MOV'IT PERFORMANCE brake calipers: Heart of all systems is the BILLET caliper, machined from solid pieces of ultra-high-strength aircraft spec aluminum. The progressive, vehicle specific piston arrangement allows for an exactly equal contact pressure, even pad wear and perfect modulation ability.

MOV'IT PERFORMANCE brake discs: A special alloy ensures lowest possible wear. The unique perforation leads to a perfect responsive brake

feeling, even under wet conditions. The inner part of the disc contains a double directional evolvent ventilation system which offers a much larger surface than same sized discs. This ensures unique heat-absorption and -transfer abilities. The discs therefore stay by far cooler than other discs of the same size.

MOV'IT PERFORMANCE brake pads: The brake pads also have an important job to do by transferring friction energy into thermal energy. Their unique, MOV'IT-developed formula guarantees super

responsive pedal feel, fading free operation and highest possible lifetime.

For further information on all of MOV'IT's braking systems, including its Ceramic, Security and SUV ranges, please visit www.movitbrakes.com
